March 31st	Deadline for return of Option Forms
May 3rd - May 13th	1:1 meetings with Mrs Ayres if necessary
w/b May 23rd	Subject choices confirmed in writing

Introduction

We aim to provide a personalised Key Stage 4 curriculum with breadth, balance and depth so that students are able to achieve in ways appropriate to their individual strengths and interests. Key Stage 4 covers Years 9, 10 and 11 and it is at this stage that students can start to make choices about which subjects to continue with to GCSE level. Whilst some courses are compulsory others are optional; a combination of compulsory, or core subjects, plus 3 GCSE "Options" make up each individual student's curriculum.

Students currently in Year 8 will be required to remain in education or training until the age of 18; this can include employment with training and so does not mean that students need to remain in school for the whole of this period. Considering future pathways early can mean that staying on until the age of 18 is enjoyable rather than a burden!

Choosing your option subjects is an important process as these courses and the qualifications you will receive at the end of the courses form the passport for entry to further and higher education as well as employment.

This booklet explains the following:

- which subjects are compulsory (core curriculum)
- which subjects are available as optional choices
- what each of the optional courses involves, how they are assessed and where they can lead to in the future
- the English Baccalaureate (E-Bacc) and restricted subject combinations

Core Curriculum

All students at Hele's School will study the core curriculum, which is compulsory. The subjects which make up the core are:

- English Language
- English Literature
- Maths
- Combined Science (equivalent to 2 GCSEs)
- Personal Development & Religious Education
- Physical Education

Most students will also take a Modern Language (French / German) as core, as we believe pupils will develop valuable skills for the future. We make provision for any student who wishes to study their core MFL to GCSE level. Some students will be guided to choose either History or Geography instead of French or German, as core.

Optional Courses

In addition to the core curriculum all students will study 3 from the following list:

- Art and Design
- Business Studies
- Computing
- Creative iMedia
- Design Technology
- Drama

- Geography
- History
- Hospitality
- Media
- Music
- Physical Education
- Religious Studies
- Spanish
- Sport
- Travel & Tourism

The English Baccalaureate (E-Bacc)

The Government introduced the E-Bacc in 2011. This is not a qualification in itself, but is an award given to students who achieve a GCSE “good pass” in all 5 of the following:

- English
- Maths
- a science (including computer science)
- a humanities (either history or geography)
- a foreign language

Our curriculum model does not force all students to take all 5 E-Bacc subjects, but certainly the majority of students do so; all students on Pathway 1 as well as anyone considering going into higher education (such as university) are advised to include either history or geography as an option, to meet the requirements of the E-Bacc.

A balanced curriculum

During Key Stage 4, students will start exploring and applying for their chosen route for years 12 and 13. It is important to keep this in mind when selecting Key Stage 4 choices. Whilst some students might have made a decision on what career path they would like to follow, this is unusual aged 12/13 and it is likely that the majority are, at this stage, unsure on possible careers.

We would advise all students to choose a broad range of courses to keep as many options open as possible, and to carefully consider taking at least one subject which has an element of internal assessment alongside those which are all examined at the end of Year 11. These subjects are Art & Design, Creative iMedia, Design Technology, Drama, Hospitality, Music, Physical Education, Sport Studies and Travel & Tourism.

Further advice and guidance on careers information is available through PD lessons, through the Careers Pilot website, or through contact with Mrs Yeomans - yeomans@heles.plymouth.sch.uk

Are you thinking of studying at university?

It is possible that a choice you make now may impact on the courses you can apply for at university, although this is unlikely. Students should be aware that some university courses will require a particular subject to have been studied at A Level, and many A levels require the subject to have been studied at Key Stage 4.

Universities publish their current entry requirements on line, and they can also be found through the UCAS website, so students may wish to do a little research in this area. The E-Bacc can be a useful addition to your application for Higher Education.

The Russell Group represents 24 leading UK universities which are committed to maintaining the very best research, an outstanding teaching and learning experience and unrivalled links with business and the public sector. They have launched an interactive website called "Informed Choices", which can be useful both for students who have a clear idea of the courses they might like to take and also for those who aim to attend a top university but are currently unsure of their particular focus on study. This website can be found at informedchoices.ac.uk

Our curriculum delivers Combined Science GCSE to all students; this does not preclude students from studying individual science subjects at A level, nor from going on to study Medicine, Veterinary Science or Dentistry at Higher Education.

Choosing courses

When you are choosing your option subjects you need as much information as possible about each course. There is plenty of information in the pages ahead, and more if you look on line. You will be asked to express several preferences for subjects you would like to study over the next three years, and will be allocated courses from your lists of preferences. The school will have the ultimate decision in determining the most appropriate package of courses for you in light of your past and current performance, your commitment to learning and your future plans. There may be some courses that do not recruit sufficiently to run; in this instance an alternative will be allocated in discussion with students and parents.

Do not make choices based on your friends' choices; the teacher you have now in Year 8, or the one you had in Year 7; whether it sounds easy/cool/good; because someone you know took it and really liked it; because it's new and you've never done it before. These are not valid reasons; you really need to be sure of what you are signing up for!

Consider a range of factors such as the assessment pattern (is it examined at the end of Y11, are there any non – examined assessments or internal assessments?); the course content; what it might lead to later in life; skills acquired throughout the course; whether or not you have enjoyed learning about this subject in Years 7 and 8.

Course allocation

Students will be allocated to courses in such a manner as to ensure that as many choices are met for as many students as possible. Where a course is oversubscribed, the School will consider a range of factors including subject preferences as identified on the Options Form, and Commitment to Learning. If a course does not attract enough students to run then the next preference will be taken from the student's Options Form.

Changing and dropping courses

It is very unlikely that you will be able to change courses once you have started a course in September. Some courses will be full, and others will start on GCSE work very quickly, so moving because you feel you have chosen a course for the wrong reasons and later asking to swap to an alternative is sometimes impossible and often very difficult.

A personalised curriculum

Students are guided onto different pathways, to enable us to structure our curriculum appropriately and meet the needs of different groups of students. We pride ourselves on having a rigorous and broadly academic curriculum at the core of every student's learning and a wide range of Level 2 courses are offered with a variety of assessment models and content.

Pathway 1

As well as the core curriculum listed previously, your son/daughter will have a Modern Foreign Language as part of their core curriculum, and will take a further 3 GCSE option subjects.

In order to fulfil the requirement of the EBacc we recommend that they select at least one of history or geography. In addition, to maintain a balanced curriculum and to spread the assessment load we recommend selecting a subject with some non-examined (internal) assessment. The assessment model is listed for each subject in the following pages.

Pathway 2

As well as the core curriculum listed previously, your son/daughter will choose between their core Modern Foreign Language, or history, or geography as part of their core curriculum, and will take a further 3 GCSE option subjects.

If they wish to fulfil the requirement of the EBacc they would need to select their language as their core option, and either history or geography as one of the other 3. In addition, to maintain a balanced curriculum and to spread the assessment load we recommend selecting at least one subject with some non-examined (internal) assessment. The assessment model is listed for each subject in the following pages.

Pathway 3

As well as the core curriculum listed previously, your son/daughter will choose between their core Modern Foreign Language or history, or geography as part of their core curriculum. They will take a further 2 option subjects and Key Skills.

Key Skills will allow for some additional support in organisation of work, and will also provide a small amount of time for completion of work from other subject areas. We will look to accredit units of work by completing some practical qualifications if appropriate, such as the IDEA Award. This is an international programme that helps students develop digital, enterprise and employability skills.

To maintain a balanced curriculum and to spread the assessment load we recommend selecting *at least* one subject with some non-examined (internal) assessment for the 2 option subjects. The assessment model is listed for each subject in the following pages.

National Qualification Framework

Several subjects can be studied at different levels. Below is an explanation of the different types of qualification. You can find out if a subject you are interested in has different qualifications by reading the details for that subject.

Qualifications: what the different levels mean	Examples of Qualifications	What they give you
Entry Level	Entry Level Certificates	Basic knowledge and skills Appropriate for students who will find Level 1 courses too challenging.
Level 1	GCSE grades 1 - 4 BTEC Cambridge Nationals Technical Award Level 1	Basic knowledge and skills. Ability to apply learning with guidance or supervision. Maybe linked to job competence.
Level 2	GCSE grades 5 - 9 BTEC Cambridge Nationals Technical Award Level 2	Good knowledge and understanding of a subject. Ability to perform a variety of tasks with some guidance or supervision. Appropriate for many job roles.
Level 3	AS and A2 levels BTEC Diplomas, Certificates and Awards Cambridge Nationals Technical Level 3	Ability to gain or apply a range of knowledge, skills and understanding, at a detailed level. Appropriate if you plan to go to university, work independently, or (in some cases) supervise and train others in their field of work.

Questions and Answers

Why do I have to state my preferences for subjects to study?

For a number of reasons. You will be required to study subjects in a great deal more depth than at Key Stage 3, and there are only so many hours in a school week; there are too many subjects for you to be able to take them all. In addition, not everyone is equally successful at all subjects, so this is an ideal opportunity for you to concentrate more on subjects which are going to be important for you and that you enjoy.

Why is my choice important?

- You are making a commitment now right through until the end of Year 11, and it is vital that you enjoy what you are doing.
- Your choice now may well make a difference to which courses you can take in Years 12 and 13 and, later, at university, college, or at work.
- Similarly, certain areas of employment may not be open to you if subjects have not been taken at KS4.

If I don't choose a subject now, can I study it later as an A level without having passed it at GCSE?

Many subjects, including Drama, Media, Hospitality, Sociology, Business Studies, Travel and Tourism, Health and Social Care, and ICT may all be studied successfully from 'scratch' in Post 16. There will also be a wide range of courses available through the Plym Learning Consortium, which will be available to you with no prior experience.

How many examination subjects will I take?

Most pupils take 9 GCSE or equivalent subjects, although some will be doing more or less depending on whether they opt to study an extra course in twilight (after school or at lunchtime), or whether they have been guided to Pathway 3.

How many subjects do I choose?

All students must take the core:

- Examined GCSE courses in English, Mathematics and Science.
- Non - examined core studies in RS, PE and Personal Development

Most students will also continue with their core MFL (French or German). In addition you will express several preferences from a list of optional subjects, from which you will be allocated three to study until the end of Year 11.

Head of Department : Ms C Wakeham

Art and Design

Edexcel 1FAO

Qualifications

GCSE Art & Design

Entry Requirements

A keen interest in Art & Design, You need to be competent in using a range of different media including painting and drawing, and an interest in exploring the visual world.

Which skills and aptitudes do I need for this subject?

An understanding of the basic principles of Art and Design

A willingness to take risks, work with different media and explore how other artists work;

The ability to organise and communicate your own ideas to others.

What is this subject about?

There are 2 elements: Coursework portfolio and Externally Set Assignment (ESA)

Portfolio: This will be a collection of pieces of your work which you will develop over the period of the course. The general principle is that it is where you finish that counts. This means that in the early part of the course you are looking to develop skills, approaches and understanding. You will have the opportunity to work with new materials and techniques. Towards the end of the course you will select what you wish to focus on, with the guidance of your teacher, to create your own project. To support the work that you do you will develop a journal that records the processes you follow.

You will explore a range of techniques in both 2D and 3D. These will include painting, printmaking ceramics and sculpture. You will also need to make references to the work of other artists, which include a gallery visit in each year.

When and how am I assessed?

Coursework portfolio 60%

ESA: this is a starting point given to you by the exam board. You will have 10 weeks in which to prepare and you are expected to develop an idea from the starting point to final outcome.

Externally Set Assignment: 40% (10 week preparation period. 10 hour exam).

Where could this subject take me in the future?

This course provides access to a range of courses. Many pupils progress to the A level course, however some choose other pathways offered elsewhere.

Many of the skills learnt have application on other courses.

Who do I need to speak to for more information?

Speak to your Art teacher.

Art and Design

"Although challenging, it was a fulfilling experience which allowed us to develop our creative and individual sparks."

Business

"Business is an important part of the world today and therefore Business Studies is a useful subject to do."

Head of Department : Mr A Smith

Business

OCR J253

Qualifications

GCSE Business

Entry Requirements

A secure grounding in English and Maths

Which skills and aptitudes do I need for this subject?

You need to possess a genuine interest in business, current affairs and the world around you. It is useful to be practical, methodical, a problem solver and able to work as part of a team as well as independently.

Most importantly you will require a positive attitude, self-motivation and organisation , with a willingness to explore new ideas and an ability to communicate those ideas effectively. These are not only the skills that you will need for the course, but also the skills needed to be successful in business.

What is this subject about?

The Business GCSE course is varied in content and will cover a number of business topic areas such as marketing, finance, law, production, human resource management and basic economics.

Students explore how business operates and its influence on society. They learn how to solve problems and explore the world of work and gain insight into various possible careers.

The course provides varied and lively opportunities to develop many new skills and to link theory with practice.

Through practical tasks you will learn the basics of how businesses operate and are set up, moving on to learn the role that people play in this process. You will investigate topics such as recruitment and selection, motivation and location of industry as part of your studies.

Through case study work you will learn about how businesses produce goods and services, the importance of finance and how the wider economy influences business.

When and how am I assessed?

2 x 1 hour 30 minute exam each worth 50% of final GCSE grade

100% Examination

Where could this subject take me in the future?

Almost every career has some element of business within it, and therefore the career opportunities after studying Business are almost unlimited.

Who do I need to speak to for more information?

Speak to Mr Smith.

Head of Department : Mr J Edwards

Computer Science

OCR

Qualifications

GCSE Computer Science

Entry Requirements

Recommendation from your Computer Science/IT teacher

Skills Required

- Keen interest in how computers work
- Willingness to commit yourself to revision for this subject
- A mindset of never giving up and persevering.

What is the subject about?

Computer Systems

This component will introduce you to the Central Processing Unit (CPU), computer memory and storage, wired and wireless networks, network topologies, system security and system software. It is expected that you will become familiar with the impact of Computer Science in a global context through the study of the ethical, legal, cultural and environmental concerns associated with Computer Science.

Computational thinking, algorithms and programming.

This component incorporates and builds on the knowledge and understanding gained in the Computer Systems Component, encouraging you to apply this knowledge and understanding using computational thinking. You will be introduced to algorithms and programming, learning about programming techniques, how to produce robust programs, computational logic, translators and facilities of computing languages and data representation. You will become familiar with computing related mathematics.

When and how am I assessed?

Content	Assessment Overview	
Computer Systems	80 marks (no calculators allowed) 1 hour and 30 minutes Written paper	50% of total GCSE
Computational thinking, algorithms and programming	80 marks (no calculators allowed) 1 hour and 30 minutes Written paper	50% of total GCSE

Where could this subject take me in the future?

This course would allow you to progress on to a level 3 Computer Science course. At the time of printing the average Computer Scientist Salary is £57,500 per year.

Who do I need to speak to for more information?

Speak to your Computing teacher.

Computer Science

Creative iMedia

Head of Department : Mr J Edwards

Creative iMedia

Qualifications

OCR Creative iMedia Level 1/2 Award/Certificate

Entry Requirements

Recommendation from your computer Science/IT teacher

Which skills and aptitudes do I need for this ?

- An interest in IT and using computers
- Being able to use Adobe Photoshop is an advantage but not essential as we will teach you how to use this program
- Being creative does help but again not essential

What is this subject about?

Cambridge National in Creative iMedia will encourage students to understand and apply the fundamental principles and concepts of digital media including factors that influence product design, use of media codes and conventions, pre-production planning techniques, legal issues and creation/publishing/distribution considerations.

Students will develop learning and practical skills that can be applied to real-life contexts and work situations. As well as think creatively, innovatively, analytically, logically and critically.

Students will develop independence and confidence in using skills that would be relevant to the media industry and more widely. They will design, plan, create and review digital media products which are fit for purpose meeting both client and target audience requirements.

When and how am I assessed?

Unit title	Type of assessment
RO93: Creative iMedia in the media industry	Written paper OCR set and marked 1 hour and 30 minutes - 70 marks
RO94: Visual identity and digital graphics	Coursework assessed tasks OCR moderated Approx. 10-12 hours - 50 marks
R095 : Characters and comics	Coursework assessed tasks OCR moderated Approx. 10-12 hours - 70 marks

Who do I need to speak to for more information?

Speak to your Computing teacher.

Head of Department : Mrs K Wooding

Design Technology

AQA 8552

Qualifications

GCSE Design Technology

Entry Requirements

If you have enjoyed KS3 Design Technology and shown at least good commitment to learning if you are creative and inquisitive and you enjoy problem solving and creating solutions then this course is for you.

Which skills and aptitudes do I need for this subject?

Have you ever wondered what designers actually do? Have you ever wondered how things move or work or what makes products successful?

A qualification in Design and Technology will prepare you to become a creative and critical thinker, developing skills to design and deliver prototypes that solve real and relevant problems. You also need to be able to apply mathematical and scientific knowledge, understanding and skills.

What is this subject about?

This GCSE will help you to understand and appreciate the design and manufacture of existing products, and to be creative in your approach to work, develop your designing ability, use of digital technologies in designing and creating products. You will learn about creative, engineering and manufacturing industries as well as about important issues that affect design in the wider world such as sustainability, global issues and inclusive user-centred design.

During the course you will study a wide range of materials; you will also develop an understanding of systems, computer aided design and mechanisms to support any potential design solutions you may develop later on. You will then develop a deeper knowledge and understanding of specific materials and related techniques and processes, in order to construct working prototypes and achieve functioning design solutions. This content reflects the importance of Design & Technology as a pivotal STEM subject.

When and how am I assessed?

The coursework Design Challenge is a single task that is worth 50% of the qualification. There will be open and real-world contexts for you to interpret and explore provided by the exam board.

The other 50% of the qualification covers the principles of design and technology in an examination. This is a single examination component with questions covering both 'core' and 'in-depth' content. This examination is 2 hours long.

Where could this subject take me in the future?

The study of design and technology can lead to future careers in product design, engineering, architecture, fashion and graphic design; it will develop your design and thinking skills that open up a world of possibility, providing the tools to create the future. You will build and develop your broad knowledge and understanding from KS3. A variety of materials are studied and different processes experienced. Your skills will be developed through working with the appropriate materials and technologies for the task. This mirrors the world of real design and leads to further specialism at A level through Product Design.

Who do I need to speak to for more information?

Speak to your Design Technology teacher.

Design Technology

"I wanted to do a GCSE that was creative, allowing me to design and make solutions to real problems."

Drama

"Not only does Drama develop confidence and allow individuals to showcase their own ideas, but it also encourages you to work cooperatively with others."

Head of Department : Mr S Jones

Drama

Edexcel

Qualifications

GCSE Drama

Entry Requirements

A keen interest in theatre practices, including acting, stage design, writing for performance and directing for stage and film. You will attend live theatre as an aspect of this course - and this will attract a fee

Which skills and aptitudes do I need for this subject?

Enthusiasm and interest for Drama. A desire to work creatively and collaboratively.

What is this subject about?

Component 1: Devising

Content overview

- Create and develop a devised piece from a stimulus.
- Performance of this devised piece or design realisation for this performance.
- Analyse and evaluate the devising process and performance.
- Performer or designer routes available.

Component 2: Performance from Text

Content overview

- Students will either perform in and/or design for two key extracts from a performance text.
- Performer or designer routes available.

Component 3: Theatre Makers in Practice

Content overview

- Practical exploration of Headlong Theatre Company's "1984".
- Live Theatre Evaluation

When and how am I assessed?

Component 1: Devising - Coursework - 40% of the qualification

Component 2: Performance from Text - Coursework - 20% of the qualification

Component 3: Theatre Makers in Practice - Written examination: 1 hour 45 minutes - 40% of the qualification

Where could this subject take me in the future?

A Level Drama and Theatre Studies. The course also complements subjects such as English and Media due to their subject matter. The course covers a wide range of creative industries and develops a student who can speak with confidence and work creatively and collaboratively.

Who do I need to speak to for more information?

Speak to your Drama teacher.

Head of Department : Mr M Kelly

Geography

AQA Geography 8035

Qualifications

GCSE Geography

Entry Requirements

At least good commitment to learning in Geography.

Which skills and aptitudes do I need for this subject?

GCSE geographers should have a keen interest in the study of the world around them. You will be working with maps, photographic and statistical data as well as GIS (geographic information systems) and digital data sources. Fieldwork is an essential element of the course which will mean planning, collecting and interpreting data from your own geographical investigations.

What is this subject about?

The geography course is all about developing a better understanding of the world we live in. Topics of study are contemporary and relevant and include natural hazards, climate change, poverty, deprivation, global shifts in economic power and the challenge of meeting our needs for food, water and energy supplies. You will be encouraged to understand your role in society, by considering different viewpoints, values and attitudes.

When and how am I assessed?

The course is divided into 3 units with an exam for each one:

Living with the physical environment - natural hazards; river and coastal environments in the UK; tropical rainforest and hot desert ecosystems.

Challenges in the human environment - urban issues in the UK and in low income countries; global variations in economic development and quality of life; management of food, water and energy resources.

Geographical applications - a critical thinking and problem solving task based on the physical and human themes above and questions focused on two fieldwork investigations completed during the course.

Where could this subject take me in the future?

Geography provides an excellent knowledge base from which to pursue many careers and post 16 courses. Geography makes use of literacy, numeracy, ICT, presentation and communication skills many aspects of which are required in the workplace.

Who do I need to speak to for more information?

Speak to your Geography teacher.

Geography

"I have discovered new cultures, enjoyed things I wouldn't normally and gained a lot of useful knowledge that also really helped in other subjects. I would recommend it to anyone."

History

Head of Department : Mrs C Farmer

History

Edexcel History

Qualifications

GCSE History

Entry Requirements

Most important is a desire to learn about the past and a determination to succeed. To be on or above the 'Securing' route in History and English is recommended.

Which skills and aptitudes do I need for this subject?

History requires a student to have good literacy skills in order to interpret source material and to organise answers clearly. Solid communication skills are necessary to present an effective argument. Numeracy skills are less important, but still useful.

What is this subject about?

- Medicine in Britain c.1250—present day & The Historical Environment: The British sector of the Western Front 1914-1918: injuries, treatment and the trenches.
- Early Elizabethan England 1558-1588.
- The American West c.1835-1895.
- Weimar and Nazi Germany 1918-1939

When and how am I assessed?

Students are assessed internally using pieces of extended writing, source evaluations, knowledge tests and past/practise exam questions. Students are assessed externally at the end of Year 11 by the Edexcel exam board. Students have three externally assessed exams to complete.

Where could this subject take me in the future?

History provides essential skills for students wishing to further their academic studies and for students seeking employment in competitive careers. History students have an understanding of human motivation and the way societies develop.

History students learn how to argue a case from evidence, even if it is a viewpoint they do not agree with at first. In addition, History students learn how to scrutinise sources of information in a way that is intelligent and sceptical. For these reasons, historians are valued especially in the following professions: Journalism, Politics, Business, Teaching, Law, Civil Service.

Who do I need to speak to for more information?

Speak to your History teacher or visit the Edexcel website here:
<https://qualifications.pearson.com/en/qualifications/edexcel-gcses/history-2016.html>

Head of Department : Mrs K Wooding

Hospitality & Catering

WJEC 603/7022/1

Qualifications

Level 2 Award in Hospitality & Catering

Entry Requirements

Good written work across the curriculum. An enthusiasm for the subject.

Which skills and aptitudes do I need for this subject?

You will need to be interested in studying a subject that is relevant to the real world of employment. You may be interested in working in the hospitality and catering sector, learning more about nutrition, food safety and how catering and hospitality establishments operate.

You will need to:

- have good verbal and written communication skills
- be able to meet strict deadlines
- have a curiosity about the sector
- be prepared to practise cooking and practical skills

What is this subject about?

The course has two units of study; one which is externally assessed (written exam) and the other which is internally assessed (controlled assessment).

When and how am I assessed?

Unit 1: The Hospitality & Catering Industry

Weighting: 40%

Assessment: externally assessed written examination of 80 minutes

Unit 2 : Hospitality and Catering in Action

Weighting: 60%

Assessment: one piece of controlled work internally assessed through written evidence and practical work to meet a brief issued

Where could this subject take me in the future?

Could provide ideas for possible Y10 work experience opportunities and part time work. Whether you intend to continue into Post 16 or move to college or training, such as apprenticeships this qualification will give you an excellent foundation for a successful and rewarding career in the Hospitality & Catering industry. Employment in hospitality and catering can range from waiting staff, receptionists and catering assistants to chefs, hotels and bar managers and food technologists in food manufacturing. All of these roles require further education and training either through apprenticeships or further and higher education.

Who do I need to speak to for more information?

Speak to Mrs Wooding or Mrs Bennett.

Hospitality & Catering

The career prospects available from the experience in this industry are vast and never-ending.

Music

"GCSE Music is a brilliant subject to take even if you don't know much theory. It helps you become more confident and helps you make friends".

Head of Department : Mr S Cartwright

Music

OCR J535

Qualifications

GCSE Music

Entry Requirements

A love and enthusiasm for music and a desire to improve performing and composing skills. The ability to read music is helpful.

At least good Commitment to Learning in Music.

Which skills and aptitudes do I need for this subject?

Students must be able to demonstrate a broad range of performing and composing skills both on their own and in a group. They will develop their performing skills on their chosen instrument and improve their creative skills through composition and harmony. The course will enable students to develop key skills in ICT through the use of computer sequencing and multi track recording of their compositions. They will also need to be able to manage their time and workload and to develop their wider skills of working with others.

What is this subject about and how am I assessed?

Integrated Portfolio (30%)

One solo performance, and one composition.

Practical Component (30%)

One ensemble performance and one composition.

Listening and appraising (40%)

One hour 30 minutes examination.

Where could this subject take me in the future?

GCSE Music is a good preparation for further musical study and a solid foundation for the AS/A2 level in music, as well as the BTEC National Diplomas (in Music, Popular Music and Music Technology). You may wish to take GCSE music for its own sake, perhaps to form the basis of a future interest. Alternatively, you may wish to go into a job where it is useful to have had an experience of music, or where you will need to use some of the skills developed during the course. These might include careers in the music industry, publishing, entertainment and teaching, or any job which involves communication and expressive skills.

Who do I need to speak to for more information?

Speak to your Music teacher.

Head of Department: Mr M Cusack

Physical Education

Exam Board AQA

Qualifications

GCSE PE

Entry Requirements

At least securing, preferably mastering in the PE performance strand. Preferably at securing/ mastering for English and Science. Students need to have demonstrated a love for the subject through attendance of extra-curricular clubs. As part of the course students are expected to purchase the GCSE PE kit to wear for their practical lessons.

Which skills and aptitudes do I need for this subject?

Must be attending extra-curricular clubs both inside and outside of school and be strong in both an individual sport and a team sport. Must possess a growth mindset and be prepared to work hard. Must be committed to playing new sports.

What is this subject about?

GCSE PE is about improving your sports performance across a number of individual and team sports. Furthermore, you will develop an understanding of how the body works and how this can be used to improve sporting performance.

How am I assessed?

Paper 1: The human body and movement in physical activity and sport

- Applied anatomy and physiology
- Movement analysis
- Physical training
- Use of data

Written exam: 1 hour 15 minutes. 30% of GCSE

Paper 2: Socio-cultural influences and well-being in physical activity and sport

- Sport psychology
- Socio-cultural influences
- Health, fitness and well-being
- Use of data

Written exam: 1 hour 15 minutes. 30% of GCSE

Non-Examined Assessment (NEA)

Practical performance in **three different physical activities** in a role of player/performer (one in a team activity, one in an individual activity and a third in either a team or in an individual activity). In addition, a written coursework component analysing sports performance makes up the NEA.

Assessed by teachers. Moderated by AQA. 40% of GCSE.

Where could this subject take me in the future?

GCSE PE is a good prerequisite for A Level PE, BTEC Level 3 Sport and then leading to higher education degree level Sports Science, Sports Psychology and Physical Education and coaching courses. Physiotherapy, Sports Coaching or Sciences, PE Teaching, Armed Forces and Nursing/Medicine would all be career paths that students could follow with GCSE PE.

Who do I need to speak to for more information?

Speak to your Physical Education Teacher or Mr Garforth (GCSE PE Lead).

Physical Education

"I am really enjoying PE at GCSE - it has given me an insight into the body and how it all works when we exercise and train properly."

Religious Studies (Philosophy and Ethics)

Head of Department : Mrs L Shelley

Religious Studies (Philosophy and Ethics) Qualifications

GCSE Religious Studies, Philosophy and Ethics (when taken as an option subject)

Entry Requirements

The desire to study and engage in debates about ultimate questions and matters to do with morality and belief. To be on 'securing' or above for English is helpful.

Which skills and aptitudes do I need for this subject?

An open-mind where you want to be challenged in different ways, excellent thinking skills and the ability to debate in a logical and assertive way.

What is this subject about?

The GCSE consists of two papers.

The themes paper focusses on topics that are current and at the heart of modern society including:

Medical ethics, including abortion and euthanasia

Ideas about the afterlife

The treatment of animals and the ethics of medical testing on animals

Human relationships, including sexuality, marriage and divorce

Relationships within different families and the changing nature of the roles of men and women. Gender equality and prejudice and discrimination.

Religion, peace and conflict, including the ethics of war, violence, weapons of mass destruction, pacifism and terrorism.

Religion, crime and punishment, including the aims of punishment and different beliefs about the treatment of criminals and the causes of crime.*

The Beliefs Paper focusses on the study of two religions. Currently we have chosen to study Buddhism and Islam.

When and how am I assessed?

The course is assessed through 100% examination at the end of year 11.

Thematic Studies – 1 hour and 45 minutes

Beliefs Paper – 1 hour 45 minutes

Where could this subject take me in the future?

The knowledge and skills gained through RS lend themselves to careers such as, Law, Police, Teaching, Nursing, Paramedic, Medicine, Journalism, Armed Forces and any job that requires a certain ability to empathise, communicate and understand other people. Many students who take GCSE progress to study the A level in Philosophy and Ethics. This is valued highly by the top universities due to the critical thinking skills involved in the subject.

Who do I need to speak to for more information?

Speak to your Religious Studies teacher.

Head of Department : Mrs A. Pike

Spanish

Exam Board Edexcel ISPO

Qualifications

GCSE Spanish

Entry Requirements

Able linguists, must be securing or mastering in French/German

Which skills and aptitudes do I need for this subject?

Understand and provide information and opinions about particular themes relating to your own experiences and those of other people, including people in countries where Spanish is spoken.

What is this subject about?

GCSE Spanish helps students develop their Spanish language skills and gives students a broad understanding of culture in Spanish speaking countries.

The course encourages a love of language learning and allows students to take their place in our multi-lingual world.

The course allows students to study a wide variety of topics that are relevant to today, such as; technology, free time activities, customs and festivals, social issues, travel and tourism, global issues and education.

GCSE Spanish will develop listening, reading, speaking, translation and writing skills.

Our aim is to enable students to develop their language skills to their full potential and to equip them with the knowledge and confidence to communicate in a variety of contexts.

Listening - Examination 25%

Speaking - Examination 25%

Reading - Examination 25%

Writing - Examination 25%

Where could this subject take me in the future?

Students who take 2 languages at GCSE are well placed for many competitive jobs in the future.

Who do I need to speak to for more information?

Speak to your Languages teacher.

Spanish

"Lessons are well-planned and carefully structured to give you the skills you need to build up your Spanish. You have to make sure you keep up to date with homework and put the extra effort in to learn your work well".

Head of Department : Mr M Cusack

Sports Studies

Cambridge National in Sports Studies

Entry Requirements

Students should be members of extra-curricular school sports clubs and/or outside sports clubs. Students also need to have competency in ICT and English. As part of the course students have the option to purchase a CNSS polo shirt for £23.00 which has their name on it.

Which skills and aptitudes do I need for this subject?

A growth mindset and a willingness to engage in both practical and theory lessons. Need to have a positive relationship with the PE department. Demonstrated good organisational skills in years 7 & 8 with a good attendance, PE kit and conduct record.

What is this subject about?

This course is designed for learners aged 14 - 16 who have an interest in sport, current affairs in sport and wish to learn about the sports industry,. In addition you will develop practical skills,, leadership skills and officiating skills.

When and how am I assessed?

There will be 3 units, one of which is examined externally. The other 2 units are assessed internally, at various points throughout the course.

Units will include:

- Contemporary issues in sport (Exam - mandatory)
- Performance and leadership in Sport (Mandatory)
- Sport and the media (Optional)
- Increasing awareness of Outdoor and Adventure activities (Optional)

Evidence for assessment can be generated through a range of activities, including workplace assessment, role play, practical performance and verbal presentations.

Travel & Tourism

Qualifications

BTEC Level 1/2 Technical Award

Entry Requirements

Good commitment to learning and a genuine interest in the industry. An interest in KS3 geography and some experience of travel are helpful.

Which skills and aptitudes do I need for this subject?

Be self motivated, driven to succeed, an independent learner, have a passion for the subject and have good extended writing skills.

What is this subject about?

This qualification has been developed to provide an engaging and stimulating introduction to the travel and tourism industry. The Pearson BTEC Level 1 / Level 2 Tech Award in Travel and Tourism is for learners who want to acquire knowledge and technical skills through vocational contexts by exploring the aims of different travel and tourism organisations, the features of tourist destinations, how organisations meet customer requirements, and the influences on global travel and tourism as part of their Key Stage 4 learning. The qualification recognises the value of learning skills, knowledge and vocational attributes to complement GCSEs.

There are three core units:

Unit 1: Travel and Tourism Organisations and Destinations

Unit 2 Customer Needs in Travel and Tourism

Unit 3: Influences on global Travel and Tourism

When and how am I assessed?

Unit 1 is a coursework-based component and will be completed in Y10

Unit 2 is a coursework-based component and will be completed in Y11

Unit 3 is an externally assessed exam and will be taken in January of Y11

Where could this subject take me in the future?

Travel & Tourism students can go on to study the subject in further education. This subject gives students experience to be able to work within the industry and build their career prospects. This is particularly useful in this part of the UK.

Many Travel & Tourism students go on to have very successful careers in marketing, hospitality and management.

Who do I need to speak to for more information?

Speak to Mrs Greet or Mrs Pike
